Financial Review By ERIC KOBBE Of Blyth, Witter & Co.

Commodity Prices and Bond Prices It is a fact that commodity prices bond prices are closely related, and the reason for the rise in the latter when the former falls and vice-versa are of interest. The relation and effect of money rates will also be shown. When credit is limited and money rates are constantly rising business men are not in a position to buy bonds. Quite to the contrary, in order to finance themselves and carry their stocks of goods, they are much more liable to sell what bonds they may hold, rather than buy more. If a man must pay, say 8 per cent, to borrow money granting his credit is good, if he holds any bonds paying around 5 per cent he is inclined to sell his bonds rather than pay such a high rate for a busi-ness loan. If his credit will not stand the loan, he must sell his bonds. So It is easy to see why bond prices would fall under these conditions, and why a reversal of them would cause bond prices to rise There is, however, a broader and a

more fundamental connection between kinds of hauling. Fireproof storage. bond prices and commodity prices.
Lightning Delivery Co... 42 S. Center.

Commodity prices have now fall about 20 per cent from their higher than the commodity prices. Commodity prices have now fallen about 20 per cent from their highest point. What does this actually mean in dollars and cents? That one dollar will now buy one-fourth more than it would a few months ago. As the purchasing power of money establishes its value, the face value of an interest bearing coupon on a bond is now therefore worth one-fourth more than it was a few months ago. This increase in the purchasing power of the dollar rs not yet being felt in its entirety in our average expenses, but it is in the wholesale prices of staple commodities and it is a matter of a short time be-fore it will be reflected throughout the tretail trade. This shows clearly, therefore, why the value of a bond increases as commodity prices fall, and while the immediate changes depend on money rates as shown, the broad swings depend chiefly on the rise and fall of commodities. Thus a close study of Undertaker and Funeral Director
Phone 4940. 617 N. Central Ave. tt change in commodity prices gives a very economic conditions as effecting the good barometer of when to buy bonds, but a close study is necessary to distinguish between temporary and periodical changes and the change in the main trend.
